

# Coordinated Community and Health Services

Keys to Student Success

# Keys to Student Success

# Currently: Fragmentation

- No universal access to collaborative services
- Not all schools have outreach consultants
  - Some having to supplement salaries
- No standardized early identification process at all school sites
- Inconsistent training for outreach consultants and school staff

# Looking at the future: Coordination

- Universal access to collaborative services
- Outreach consultants at each site
- Standardization of identification process to meet student needs
- Standardized training for outreach consultants and other support staff (COST and SST processes)

# Basic Needs

- No universal access to case management services
- Points of access are not coordinated:  
Two collaboratives  
different district  
departments and  
community partners

- Universal access to case management services
- One point of access to all services  
(simplified, direct and economical)

# School Safety

- Not all sites have a trained crisis response person
- Only three schools implementing Positive Action (Bullying prevention and character education)
- SRO presence at Middle schools
- All ORCs trained as a school crisis response team leader
- All ORCs will update school crisis response procedures
- ORCs will be trained as trainers on Positive Action Curriculum
- SROs will be sustained through partnerships and grants

# Health Services

- Office staff responsible for health insurance campaign
- Some schools utilizing lice clinics
- Some schools utilizing COST process to address needs
- No data system to track services
- Consultant to evaluate status of services available at school sites through nurses and health assistants
- Improved health insurance enrollment campaign coordinated by ORCs and principals
- Easy electronic referral process for all teachers
- Universal access to lice and Immunization services through COST
- Data base System in place

# Mental Health Services

- Some schools contract with local service providers
- Services target 12 to 15 students per school
- Universal access to mental health services
- Services will increase to target 30 to 40 students at each site
- No schools will have to use site funding

# Academic Supports

- Only three Montclair schools participating in the Online to College
- Most schools providing parenting classes
- Montclair and Ontario schools participating in Online to College
- All schools will have onsite parenting classes

# Coordinated Community and Health Services

Opening the doors to success by  
removing barriers and increasing  
access.

Because after all

it is all about the children...
