

# ***The 10 key questions PDs need to answer to strengthen school/community security***

**Project Directors' Consortium, March 17, 2010  
Becky Sharpe, Charlotte Bernard, Randy Evetts,  
and John Rosiak**

# The Questions

1. *When it comes to developing and strengthening your school/community security plans, where did you start?*
2. *Since we are talking about school/community plans, who are all of the community partners you brought to the table and how did you do it?*
3. *How do you engage the CMT in school/community plans?*
4. *Given that a crisis in a school or community may have a dramatic effect on the mental health of students, how does your initiative prepare to handle related mental health issues?*
5. *Let's talk about some different aspects of information sharing: sharing information about students; communicating with partners. What relationships and mechanisms do you have to ensure that information is shared about a student who might pose a threat? What information sharing protocols do you have between agencies to make sure that people who need information can coordinate?*
6. *What does your initiative do to communicate about security plans with school staff and students, and with the community?*
7. *Let's talk about practicing the emergency management plan. How does your school/community work out the protocols, and do table top drills, lockdown drills, and debriefs?*
8. *What kinds of training or other resources does your initiative take advantage of in the development and execution of its school/community security plans?*
9. *What are the key lessons you have learned that you want to share with other PDs?*
10. *What do YOU, the audience, want to know that we haven't covered?*

# Where did you start?

**Who are your partners and how did you bring them to the table?**

# How do you engage the CMT?

# How do you prepare for MH issues?

# **Sharing information about students; communicating between partners?**

# Communicating plans to school and community?

# How do you practice the plan?

# Training and other resources?

# Key lessons to share?

**What do YOU want to know?**
